ARTA 2957 Special Topics Course: Then & Now: A Re-Photographic Survey of Kingport, Tennessee. This advanced photography course, students will work in conjunction with the Kingsport Public Library and Archives to create a new portfolio of photographs based on historical images contained in a database of over 2,000 photographs. The course will involve researching the archives in order to select photographs which will be studied and analyzed for data critical to their creation- location, date, time of day, camera format, film, etc. We will utilize contemporary satellite mapping technologies and sun tracking software to establish the most appropriate time & Location for the creation of a new photograph of the original site. Fieldwork will comprise a large portion of the class, centered on the making of large format B&W photographs throughout the Kingsport area. Sheet film development, digital scanning, & archival pigment printing will be covered in order to produce a complete exhibition which will show at the Renaissance Center Gallery in Oct. 2011. This is a special, one-time offering of this course & represents a unique opportunity for students to engage in a meaningful project that draws on photography, local history and community service.

The presidency of George W. Bush was one of the most controversial in modern American history. President Bush entered office in January 2001 after the tumultuous 2000 presidential election and not only became a wartime president but an extremely powerful chief executive. The course will examine the Bush legacy without the polarization, rancor, and emotionalism that so defined his years in office and assess the Bush administration's successes and failures.

Note: This course (Research Experience in Mathematical Epidemiology) is a workshop on fundamental aspects of mathematical modeling applied to transmission dynamics of communicable diseases. This course has four parts. First, lectures and computer laboratories will be given, conveying introductions to deterministic models for interacting species, linear stability analysis, computer simulation, and model time validation against data. Second, teams of students will work on research projects and will submit a final project typed in LaTeX. Third, students will attend 2011 CBMS ETSU Lecture Series on July 25-29, 2011 (<http://www.etsu.edu/cas/math/cbms.aspx>). Fourth, students will meet with the instructor for four weeks during Fall 2011, to read research papers and give oral presentations.

PSCI 4957/5957 is titled "Appalachian Politics". Our region has grown and changed dramatically. New shopping centers, restaurants, and subdivisions have sprouted up all over. Medical and other services have expanded greatly. But are all these changes good? What have been the costs of this growth? More traffic, more flooding, rapidly disappearing farmland, and environmental problems come with it. What can we do about these? Are we losing our identity as we grow? Are we becoming "anyplace" just "no place" in particular? Do we have a landscape, a local culture, a local "personality" that is worth saving/ Reading, lectures, road trips, and discussions with public officials and active citizens. There will also be an over-night field trip. For additional information, contact Dr. Joe Corso at 439-8436 or at corso@etsu.edu. There are no prerequisites for this course.
