Tennessee Drought Update

For the assessment period ending March 07, 2023

This Week's Drought Monitor of Tennessee Map

From the US Drought Monitor, authored by Deborah Bathke, National Drought Mitigation Center with input from the Tennessee Climate Office

 Tennessee remains free of any drought conditions.

Change Since Last Week

Statewide Condition Summary

What's Changed? Most areas of the state saw rain this week as well as warmer temperatures. There were no changes in this week's drought monitor.

What's New? Almost all areas of Tennessee had drier conditions with some precipitation, the rain from the previous few weeks is keeping Tennessee out of drought consideration for this week's monitoring period.

What's Next? Most areas of the state are expected to receive precipitation in the next drought monitoring period (Tuesday to Tuesday). There is a small area of concern in southwestern Tennessee that will continue to be monitored. For now Tennessee will likely continue to be clear on the US Drought Monitor.

Statewide Coverage By Category

Category	Coverage This Week	Change Since Last Week
D0: Abnormally Dry	0.00%	0.00%
D1: Moderate Drought	0.00%	0.00%
D2: Severe Drought	0.00%	0.00%
D3: Extreme Drought	0.00%	0.00%
D4: Exceptional Drought	0.00%	0.00%
