ARTA 4957-010 Special Topics "Animal, Myth,& Ritual" Course Description: Part seminar, part studio, this course we will explore how animal imagery has been used in art from prehistoric times to now. We will start with viewing ethnographic films of shamanic rituals, rock art from Zimbabwe, and other historical models. Then, we will examine the work from contemporary artists such as Ann Hamilton, Matthew Barney, and Sam Easterson. For the studio component, students will be encouraged to explore a variety of mediums and methodologies as they produce a small body of artwork in tandem to the course topics.

Note: HIST 4957/5957-001 Playing Doctor: Medicine and Health in Film - In this course, we will examine how different aspects of health, illness, patients, and medical practitioners have been portrayed in film. Our aim is to explore what we can learn about how different societies in different time periods have viewed disease and the medical field. And how can we use film as documents, both primary and secondary, to understand medicine and society more broadly in the past. This requires awareness of the historical context of the films themselves. We will ask what different definitions of "disease" or public health have existed and been used in film. How have some aspects of the medical profession or certain illnesses been portrayed and why? How has film been used as a tool of rhetoric and how has film influenced our understandings of medicine and even our own bodies. In order to facilitate our discussions of the films viewed in class, there will be short outside readings assigned and several short writing-assignments.
