Goal Directed Learning:

Early Assessment and
Individualized Education Plans for
Family Medicine Interns

Glenda F Stockwell, PhD, Beth A Fox, MD, Reid Blackwelder, MD East Tennessee State University

Time frame:

- Welcome, background, objectives
- Participants share experiences
- Rationale, literature, our approach
- Benefits and outcomes
- Small group discussion
- Large group debriefing
- Summary and conclusion

- (5 minutes)
- (15 minutes)
- (20 minutes)
- (10 minutes)
- (20 minutes)
- (15 minutes)
 - (5 minutes)

Objectives

- Articulate rationale for early assessment
- Describe process of assessment and feedback sessions
- List benefits of process based on:
 - Objective data
 - Opinion of interns over past 2 years

Handouts

- Goal Directed Learning Goals & Objectives
- Sample Schedule
- Competency based self assessment form
- Case presentation assessment checklist
- Common Ground Assessment Instrument
 - Criteria for assessment in each category

There is something You Don't Know

R.D. Laing (adapted)

There is something you don't know that you are supposed to know. You don't know *what* it is you don't know, and you feel you look stupid if you seem both not to know it and not know what it is you don't know. Therefore, you pretend to know it.

There is something...

R.D. Laing (adapted)

This is nerve-racking since you don't know what you must pretend to know. Therefore you pretend to know everything.

You feel I know what you're supposed to know but I can't tell you what it is because I don't know that you don't know what it is.

There is something...

R.D. Laing (adapted)

```
I may know what you don't know,
But not that you don't know it,
And you can't tell me.
So I will
have to
tell you
everything.
```

Your experiences

- How and when do you assess your interns' competence
- What works
- What doesn't

Rationale

- Statement of the Problem
 - Knowing what they know
 - Need to assess baseline skills
 - Varying levels of clinical skill and experience
- Benefits of Early Assessment
 - Patient safety Targeted teaching Successful start
 - Identify problems early
- ACGME Core Competencies

Brief literature review

- Professionalism in Emergency Medicine (Larkin, Binder, Houry, Adams, 2002)
- Core Competencies in Integrative Medicine (Kligler, Maizes, Schachter, PSrk, Gaudet, Benn, Lee, Remen, 2004)
- Direct Observation for Assessing Interpersonal Skills (Jouriles, Emerman, Cydulka, 2002)
- Educational Interventions to Address Core
 Competencies in Surgery (Sachdeva, 2003)

Brief literature review

- Assessing the ACGME General Competencies (Swing 2002)
- The ACGME Core Competencies: A National Survey of Family Medicine Program Directors (Delzell, Ringdahl, Kruse 2005)
- A Counseling Practicum Curriculum to Teach and Assess ACGME Core Competencies (Dankoski, 2006)

- Considerations
 - What should be assessed
 - When should assessment take place
 - Who should assess resident performance
 - How should assessment be done

- Methods for assessment
 - Ratings
 - Checklists
 - 360-assessment
 - Oral exams structured case discussions
 - OSCEs
 - Simulations
 - Portfolios
 - Direct Observation

- Wide variation in design and implementation
- Methods that include:
 - Focused assessment of residents performing
 - Clinical tasks
 - Instruments designed for the tasks
 - Task specific performance criteria
 - Training of evaluators
 Produce results with higher reliability
 OSCEs, SP exams (SP checklists)

- Survey of program directors (2005)
 - Believe patient care most important competency
 - Time major barrier to implementation
 - Need for faculty development
 - PDs didn't correctly identify evaluation tools they were already using
 - 99.6% using ITE
 - 53.3% identified it as a method they were using

I

Survey of program directors (2005)

 Active precepting 	76.0%
Record review	72.8%
 Procedure logs 	63.8%
 Simulations 	11.1%
 Audit of computer utilization 	10.5%
• OSCEs	9.1%

- All competencies are not created equal
 - More familiar with assessing some
 - I & CS taught through role modeling
 - Assessment subjective
- Adult education principles
 - Experiential learning
 - Reflection and analysis of one's thinking
- Feedback
 - Detailed, specific, timely

- Direct Observation (Emergency Medicine)
 - Faculty shadows resident for 4 hours in ED
 - History taking
 - Physical exam
 - Generation of differential diagnosis
 - Resource utilization
 - Interpretation of data
 - Procedural skills
 - Charting
 - Communication skills
 - Patient care efficiency
 - Faculty completes a "Direct Observation" form

- Counseling Practicum Curriculum (Family Medicine)
- Communication and interpersonal skills
 - Counsel own patient 1 hour
 - Live supervision by faculty and peers
 - Pre-mid-post session for feedback, direction, debriefing
- Benefits
 - Experiential learning process
 - Immediate teaching moments
 - Real time assessment

Our Approach to the Problem

- How do we teach our students
 - COL
 - OSCE
 - POM
 - Communication Skills
 - Presentation Skills

Our approach...

- What has worked in the past
 - OSCE
 - ECG
 - Video recording and review
 - Self evaluation
 - Faculty evaluation

Our approach...

- What methods do we have available
 - ACGME competencies
 - Practicing medicine cases
 - Recorded communication sessions/review
 - Self assessments based on competencies
 - Human Patient Simulation
 - Faculty expertise

Before they arrive...

- They receive a packet with
 - Communication CD
 - Rapport
 - Agenda setting
 - Information Management
 - Active listening
 - Addressing feelings
 - Reaching common ground

Before they arrive...

- They also receive
 - Detailed PE handout
 - PowerPoint on ECG
 - PowerPoint on differential diagnosis

Goal Directed Learning Structure

- 2 weeks 3 interns
- 4 weeks in July
- FMS
- FPC
- Clinic

GDL Content - half day sessions

- Residency Expectations
- PGY 1 Peer Group meeting
- Clinic
- Communication Skills and OSCE
- ITE
- Competency-based Self Assessment

GDL Content

- Human Patient Simulator
- Chart review & coding
- PE SP checklist & direct observation by faculty
- Procedures
- ECG packet
- Practice medicine cases

After completing GDL

- Intern meets with Program Director,
 Faculty Advisor and Psychologist
 - Go over results
 - Discuss strengths
 - Discuss growth opportunities
 - Develop specific goals and strategies for improvement
 - Competency based summary letter

Outcomes

- Introduction to our education style
- Confidence-building
- Identification of "Partners in Difficulty"
- Resident-specific educational and catch-up plan
- Improved medical knowledge
- Better prepared to care for patients

Exam Scores

	Step 2	GDL ITE	ABFM ITE
Intern 1	190	370	450
Intern 2	206	240	330
Intern 3	243	340	440
Intern 4	193	200	360
Intern 5	189	220	380
Intern 6	226	370	NA

Benefits

- Identification of personal strengths
- Identification of growth opportunities
- Introduction to ACGME competencies
- Communication problems (ESL)
 - Verbal, written, and comprehension
- Immersion in clinic with closer faculty guidance
- Introspection and self assessment
- Bonding and "safe place"

What was helpful about GDL

- Learned to be 'independent' in clinic
- Oriented IMGs to US medical system
- Decreased anxiety
- Learned how to write notes
- Introduced to coding
- Building relationships "meeting every week in July was great"

What was helpful about GDL

- Weekly PGY 1 meetings normalize the "Oh my gosh, what have I gotten myself into?" feeling.
- ITE was useful not pleasant but useful
- "Some of my friends in other programs still don't know the names of the other interns" April 2010
- ECG "didn't know at all before GDL"

What should we add to GDL

- More orientation to hospital:
 - Portal
 - Morning report
 - Rounds
 - Go over chart
 - How to dictate how to press the button
 - What to include in dictation

What should we add to GDL

- Shadow a resident (hospital)
- Discuss case managers role
- More procedural "stuff"
- Review chest x-ray
- Review CT Scan
- Write prescriptions
- More time with ICD 9 & Flash Coder

And... finally ...please tell us

- GDL
- ITE
- OSCE
- FMS
- FMC
- PD
- COL

- SPs
- STFM
- EKG
- ECG
- TLA
- POM
- PID
- BFF

Small Group discussion

Additional ways to improve the process

Large Group sharing

Debriefing and collaboration

AFTER GOAL DIRECTED LEARNING

R.D. Laing (adapted)

You know what you don't know,
And I know that you don't know it.
So we will
make a plan
to help you learn it.

And then you will know.
